### BARTON FIRTOP ENGINEERING QUALITY POLICY

**The Barton Firtop Engineering Co. Ltd. (Incorporating RGR Fabricating and Welding Services) is a leader in the design, development and manufacture of Filters, Strainers and Coalescers for fluid processing applications and the procurement and supply of Flame Arresters and fluid control equipment associated with the above products.**

**The company aim is to provide valued, defect-free, safe and reliable products that meet all applicable statutory and regulatory standards and agreed customer requirements and specifications in line with the specific QHSE Objectives.**

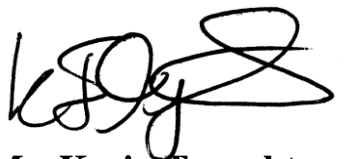

**This is achieved through the implementation of a Quality Management System which meets the requirements of International Standard ISO 9001:2015 and Technical Specification CEN ISO/TS 29001. All Barton Firtop Engineering products are included in the scope of the Quality Management System with no exclusions and, where appropriate, they comply with the Pressure Equipment Directive 2014/68/EU Modules A, B, D, D1 and F.**

**Senior Management is committed to this aim through the provision of all necessary resources and the setting and monitoring of objectives for improving performance.**

**The Quality Objectives and the policy are reviewed and amended as necessary at the Management Review meeting.**

**Copies are on view in Reception and on Company Notice Boards and available to interested parties on request and also via the organisations website.**

**Signed**

**Mr. Kevin Troughton**

**Operations Director**
